Balance Your Day, Boost Your Life

Boost Me is an AI-powered gamified mobile app that high school and university students manage their study schedule, build healthy habits, stay motivated, and maintain a balanced daily routine

AI Schedule

Healthy Habits

Gamified Motivation

About On Track

Boost Me is designed to help high school and university students build a more balanced daily routine by combining smart planning, healthy habits, and fun motivation in one experience.

The app focuses on :

1) Daily Structure & Planning

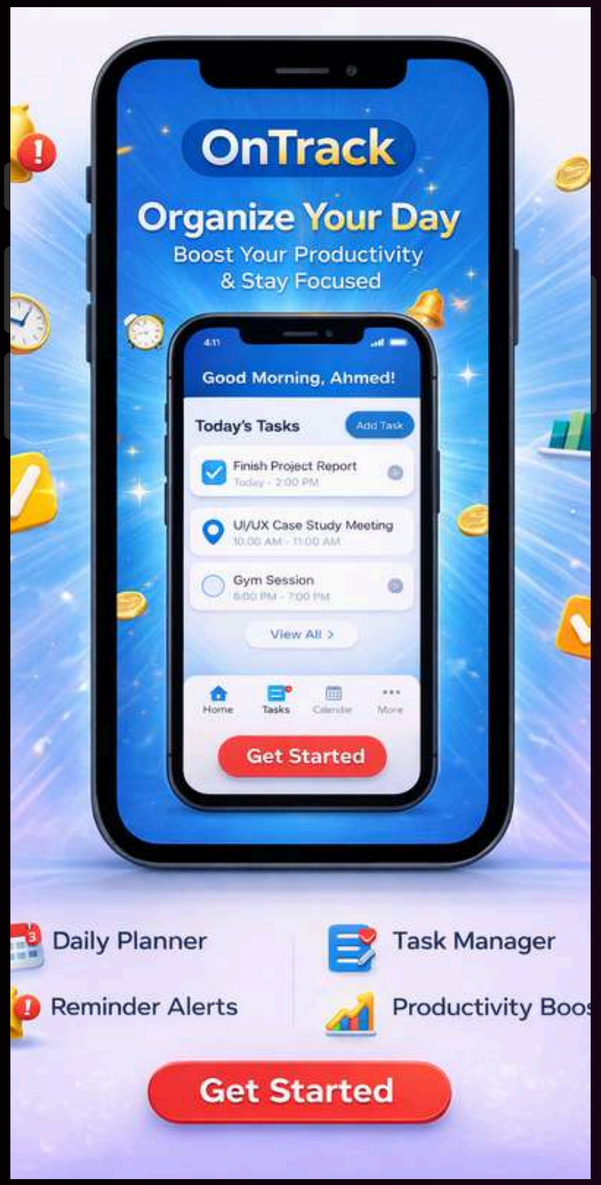
An AI-powered schedule that helps high school and university students organize their day — from classes and study time to breaks, activities, and personal life.

2) Healthy Lifestyle Guidance

Encourages healthier habits through water reminders, light-movement prompts, healthy snack suggestions, and simple wellness tracking

3) Motivation & Engagement

Gamified with points, levels, streaks, and rewards to keep students motivated and make daily routines more enjoyable.



Market Research

Students Behavior Insights

- Students get easily distracted by social media.
- Many lack structured study routines.
- Low motivation without rewards.
- Difficulty balancing school, study, sports, and social life.
- Poor hydration and frequent unhealthy snacks.

Market Gap

No existing app combines AI scheduling, study planning, healthy habits, and gamified motivation in one teen-friendly experience.

Competitor Analysis

Tiimo: Great for visual planning, but lacks health tracking and gamification.

Finch: Good for habits and wellness, but doesn't organize study time.

Habitica: Strong gamification but no AI schedule or teen focus.

Kurbo: Health-focused but lacks planning and motivation features.

Why

Students struggle with time management, low motivation, and unhealthy habits. Boost Me provides a simple, fun, and structured way to help them balance study, health, and personal time.

Who

High school and university students (12–25) who need guidance to organize their daily routines, manage classes and study tasks, build healthy habits, and stay motivated..

What

A gamified AI-powered mobile app that creates personalized schedules, tracks habits, suggests healthy snacks, and rewards progress.

5 W

When

Used throughout the day — before classes, during breaks, after classes, before studying, or before sleep.

Where

Anywhere — at home, school, study centers, sports clubs, or even on the go.

THE ATTRIBUTES

01
TEEN-FRIENDLY & PLAYFUL

Bright colors, smooth shapes, and fun 3D illustrations that match student energy and behavior.

02
SMART & ADAPTIVE (AI-POWERED)

Generates personalized study schedules based on each student's availability, habits, and priorities.

03
HEALTH-CENTERED GUIDANCE

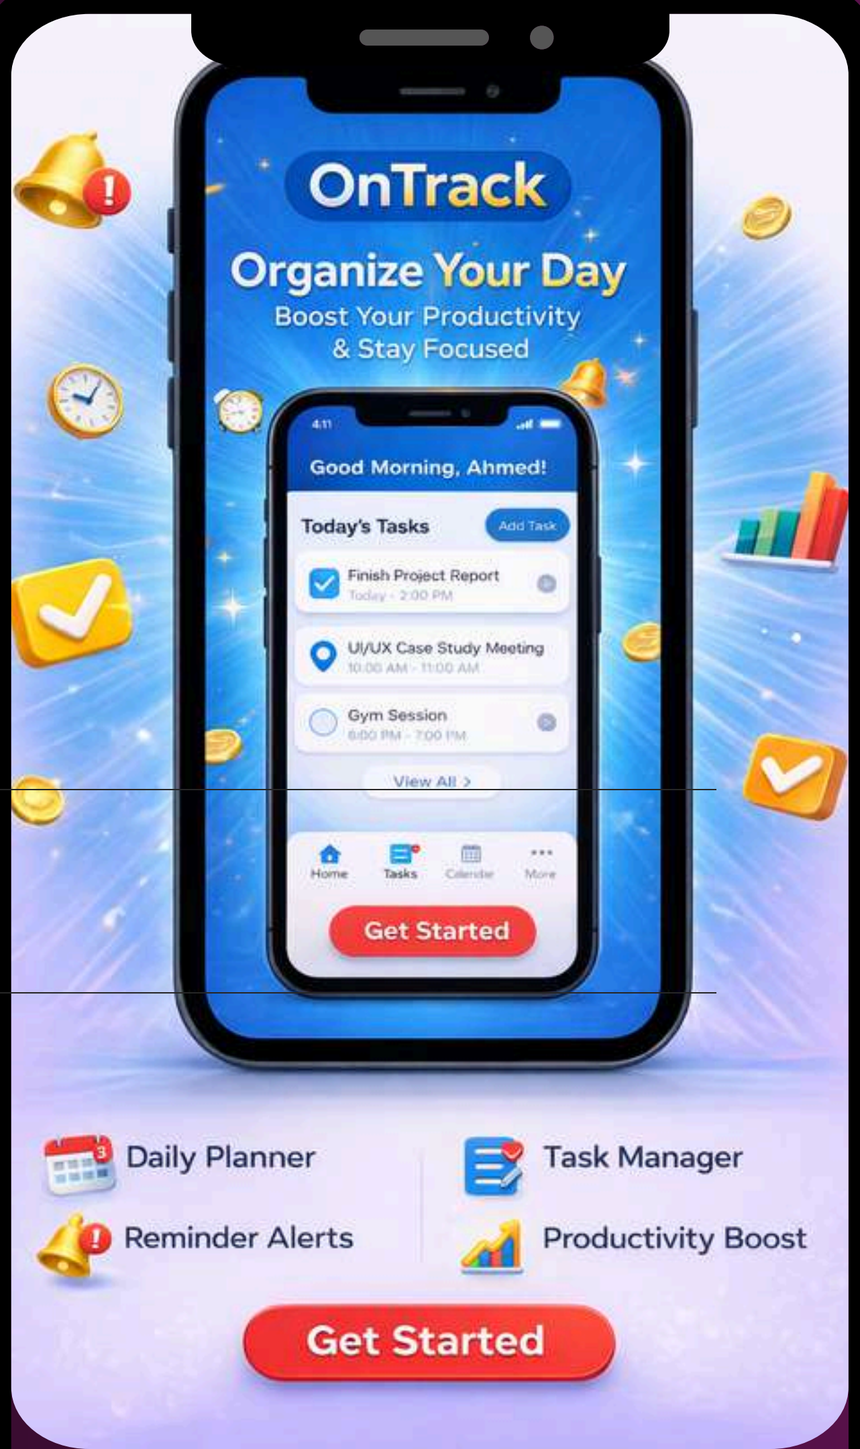
Supports better routines with water reminders, healthy snack suggestions, break prompts, and wellness tracking.

04
GAMIFIED MOTIVATION SYSTEM

Uses XP, levels, streaks, rewards, and achievements to keep teens motivated.

05
SIMPLE, CLEAR, AND EASY TO USE

Clean, intuitive, and accessible design that makes planning effortless for students.



BUSINESS MODEL

Model Freemium + Premium Subscription

Revenue Subscriptions, family plans, and educational institution plans.

Users: Students, parents, and learning centers

Costs Development, AI, design, support, marketing

Value A single app that combines time management, healthy habits, and motivation.

User Research Process

- The research process begins with stakeholder interviews to define the project goals, vision, and constraints.
- User interviews are then conducted with students to understand their daily routines, challenges, motivations, and habits.
- Surveys are used to gather insights from a larger group of users.
- All findings are analyzed and organized using affinity mapping to identify key insights that guide design decisions.

Stakeholder Interview Questions

These questions aim to align business goals with user-centered design decisions.

1. What is the main goal of the Boost Me app from a business perspective?
2. What key problem do you believe this app should solve for students?
3. Who do you consider the primary target users for this app, and why?
4. How would you define success for Boost Me after launch?
5. Are there any must-have features that you believe are essential for the app?
6. What values or principles should guide the app's design and user experience?
7. How will students interact with the app throughout their day?
8. Are there any user behaviors you want the app to encourage or discourage?
9. Are there any constraints we should be aware of, such as budget, timeline, or technical limitations?
10. Do you have any concerns related to teen safety, privacy, or data protection?

User Interview Questions

These questions aim to understand teenagers' needs, behaviors, and daily challenges.

1. What does a typical day look like for you in terms of school, studying, and free time?
2. What are the biggest challenges you face when trying to manage your time?
3. How do you currently keep track of your school tasks, lessons, or study schedule?
4. What usually distracts you the most during studying or homework time?
5. How do you feel about using mobile apps to help with time management or productivity?
6. What motivates you to stay consistent with a routine or habit?
7. Do you have any habits you would like to improve, such as studying, sleeping, or eating healthier?
8.How do you prefer to receive reminders or notifications during the day?
9. What features would make you want to use a productivity app every day?
10. Is there anything you dislike or find frustrating about similar apps you have tried before?

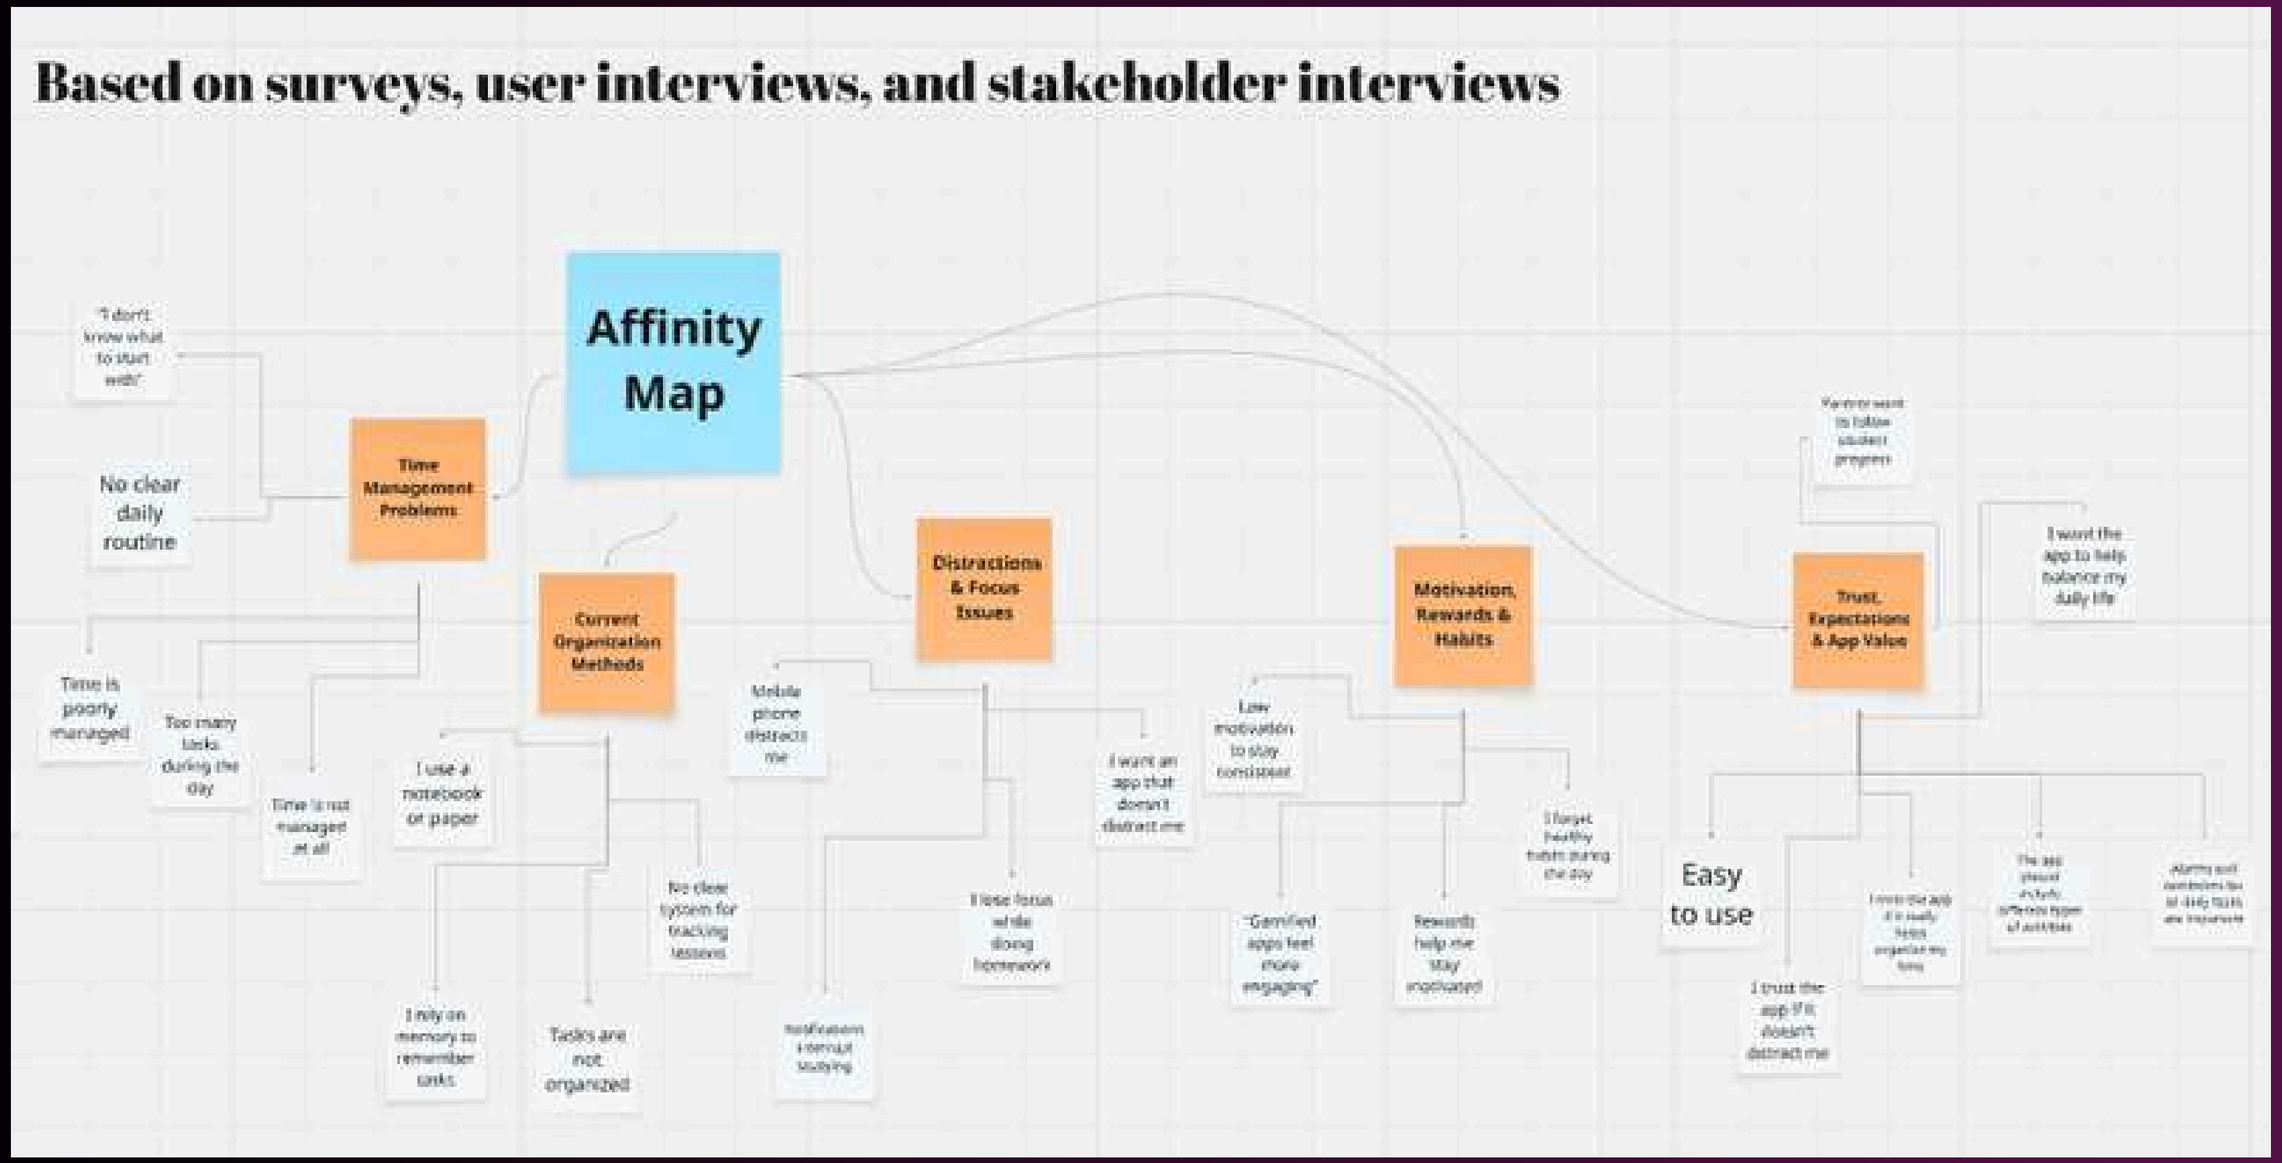
Affinity Map



Insights

Users struggle with managing multiple daily tasks and lack a clear system, which makes them feel overwhelmed and unsure where to start.
Insights
Motivation increases significantly when progress is visible and when rewards or gamification elements are present.
Distractions, especially mobile phones and social media, are a major barrier to focus during studying and homework time.
Most users rely on ineffective or inconsistent methods to organize their tasks, such as memory, notebooks, or unstructured tools.
Users trust productivity apps only when they see real, noticeable improvement in their daily organization without feeling distracted or overwhelmed.

User Persona

AHMED MEZAR

Preparatory student

PROFILE

Gender : male
Age : 15
Address : Cairo

PERSONALITY

- Ambitious
- Tech-interested
- Easily distracted by mobile phone

BIOGRAPHY

Asser is a high-performing 15-year-old student with a very busy daily schedule.
He struggles to organize his time between studying, sports, and other activities.

MOTIVATIONS

- Staying academically excellent
- Balancing school, sports, and personal interests
- Seeing clear progress and achievements
- Feeling in control of his daily routine

QUOTE

I want an app that helps me organize my time without distracting me.

PAIN POINTS

- Too many daily tasks
- No clear routine
- Gets distracted by phone
- Poor time organization

GOALS

- Organize daily schedule
- Balance study and activities
- Stay motivated without stress

NEEDS

- Simple time management tool
- Smart, non-distracting reminders
- Motivation through progress and rewards

Problem

High school and university students (16–25) often have busy daily schedules that include classes, studying, extracurricular activities, and online courses.
Despite being motivated and academically successful, many of them struggle with poor time organization, lack of a clear daily routine, and frequent distractions from mobile phones and social media.

Current methods such as notebooks, basic reminder apps, or relying on memory are unstructured and ineffective, and they fail to keep teenagers motivated or help them balance study, health, and personal activities.
This leads to missed tasks, stress, and frustration for both teenagers and their parents.

There is a need for a simple, teen-friendly, and non-distracting solution that helps teenagers organize their time, build healthy habits, stay motivated, and maintain a balanced daily routine.
